

Laxmikant Karwa

Kharadi, Pune, 411014

+91-9665511207 | lkkarwa95@gmail.com

Skills

- Frontend: ReactJS, Redux, Redux Toolkit, Redux-Saga, Thunk, JavaScript (ES6+), TypeScript, HTML5, CSS3, SvelteJS
- Architecture: HOC design, Component Reusability, Responsive UI Development, State Management, Micro-Frontend, Containerisation
- Tools & DevOps: Git, GitHub/GitLab Setup, CI/CD, Agile, JIRA, Jest
- Testing & Optimization: Manual Testing, Accessibility, Lazy Loading, Pagination
- CMS & Backend: Apostrophe CMS 2, Node.js, GraphQL, REST APIs, MongoDB, MySQL
- Others: React Native, iOS/Swift 5.1

Experience

- **Michelin** 09 May, 2023 - Present
Deputy Manager, Frontend
 - Spearheaded frontend architecture and deployment across 140+ global websites using Apostrophe CMS 2
 - Developed responsive UIs optimized for multi-device and multilingual accessibility
 - Built and maintained reusable components and HOCs for scalability and performance
 - Collaborated with backend teams to integrate Node.js and MongoDB seamlessly
 - Conducted regular code reviews, mentored junior developers, and contributed to agile ceremonies
 - Performance Improvement
 - Reduced load time by 70%
 - Led Git initialization, branching strategy, and CI practices for new applications
 - Mentored code optimizations and review requests.
- **Fiserv** Dec 02, 2021 - May 08, 2023
Software Development Engineer
 - Engineered end-to-end web solutions using ReactJS, Redux, and MySQL for enterprise clients
 - Implemented responsive UI designs, session handling, role-based access (RBAC), and form validations
 - Created modular HOCs to streamline UI behavior and performance
 - Led initial Git setup and integration with deployment pipelines
 - Ensured code quality through manual testing and AWS-based deployment tracking
- **Mindstix Software Labs** June 17, 2018 - Nov 30, 2021
Frontend Web Engineer
 - Delivered multiple ReactJS applications from scratch, leading initial Git-based setup, branch strategy, and environment configuration
 - Developed responsive UI interfaces from wireframes, integrating REST and GraphQL APIs
 - Designed HOCs for common behavior and UI optimization
 - Optimized rendering with lazy loading and pagination for large datasets
 - Conducted end-to-end feature testing, bug resolution, and CI-based deployment to AWS
 - Build paginations and error screens.

Projects

- **Staples (React + Redux + JEST)**
 - Built responsive UI, implemented HOCs, lazy loading, and comprehensive unit testing.
 - <https://www.staples.com>
- **Single Dose (React + REST APIs)**
 - Developed login/logout, RBAC-driven views, and cookie-based session management.
- **TROTM / NAOTM (React + GraphQL)**

- Designed frontend architecture, API integration, validations, and Chart.js visualizations.
- **Helix (React + MySQL)**
 - Delivered secure and scalable UI, optimized form handling and pagination, deployed on AWS.
 - <https://www.helix.q2.com/>
- **Michelin B2C + B2B (Apostrophe CMS 3 + JS + Astro)**
 - Led global UI rollout, ensured localization support, performance tuning, and Git-based deployment setup.

 - <https://www.michelin.in>

Education

- **Savitribai Phule Pune University** 2019
Bachelor of Engineering
7.6
- **MP board of secondary Education** 2013
12th
87.60%

Interests

- UI/UX Engineering
- Frontend Architect
- People Management (Technical + Managerial)
